

North Star Flyers: Sundowner Safety Review

The Beechcraft Sundowner is a robust, four-seat single with good performance and comfort. While its systems are relatively simple and its flight characteristics easy to master, preventable accidents and incidents still occur every year that a deeper understanding of the airplane could prevent. In this seminar, we will study the safety record of the airplane and go into the details of several accidents to find the lessons we can learn from them. Please note: Facility limitations restrict attendance at this seminar to members only.

Please contact Jack Shelton, FAASafetyTeam representative, if you would like this seminar presented at another venue.

Directions: The meeting will be held in the classroom at Sim Flite Minnesota, on the first floor of the red and white hangar adjacent to RC Avionics at Anoka County Airport.

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area
